Draft Commander® Mobile Fire Appliance Testing & Training

Model No. DCA-1962-1000 to operate in accordance with *NFPA 1962: Standard for the Care, Use, Inspection, Service Testing, and Replacement of Fire Hose, Couplings, Nozzles, and Fire Hose Appliances*

Call (888)689-9347 for more information, or visit draftcommander.com

Draft Commander® Fire Pump

Draft Commander® Fire Pump is a HPX275-B35 Fire Pump that is permanently mounted on the rear of the unit. The fire pump allows the Appliance Tester to be a self-contained unit so that a fire apparatus is not needed to operate the unit. There is a solar panel mounted on the unit that charges the battery being used when starting the fire pump. A Battery Tender is supplied with the pump for ability to charge battery when unit has been stored for a period of time or not in direct sunlight.

Draft Commander® Hard Suction Hose Vacuum Testing Unit

Designed to test the vacuum retention and structural integrity of hard suction hose per NFPA 1962, the Draft Commander® Hard Suction Hose Vacuum Testing Unit is located at the rear of the Draft Commander Mobile Fire Appliance Testing & Training Unit and comes with several couplings for compatibility across different sizes of hard suction hose.

Draft Commander® Fire Hose & Appliance Tester

Designed to test fire hose and fire appliances such as valves and couplings per NFPA 1962. Testing fire hose and fire appliances per NFPA insures the safety of personnel operating equipment, providing a reasonable assurance that the equipment will perform as designed.

Draft Commander® Handline Nozzle Tester

Draft Commander® Handline Nozzle Tester is the most accurate way of testing the flow and pressure of handline fire nozzles while conserving water. When using the nozzle tester, your nozzles are recirculating water into the Draft Commander® and pumping back out of the nozzle through your fire pump. Designed to operate in accordance with NFPA 1962.

Introducing the newest innovation in the firefighting industry:

The Draft Commander® Mobile Fire Appliance Testing & Training Unit

Provide training for fire pump engineers & firefighters while recirculating water, saving millions of gallons in a short period of time.

Testing Fire Apparatus Appliances to be ready for action

Handline Fire Nozzles

Fire Couplings

Fire Valves

Hard Suction Hose

Fire Hose
