

New Environmental Training Innovation

DRAFT COMMANDER 3000[®] TRAINER

FOR FIREFIGHTERS & FIRE PUMP ENGINEERS

MADE IN AMERICA

TRAIN TO SAVE LIVES.
TRAIN TO SAVE PROPERTIES.
RECYCLE TO SAVE WATER.

- Train Fire Pump Engineers to simulate pumping from a fire hydrant with incoming residual pressure with the optional Fire Hydrant Pump.
- Conduct Firefighter hands-on training to simulate fighting an actual fire. Firefighters can operate various types of handline and/or stationary nozzles and discharge the water back into the Draft Commander 3000[®] Receiver.
- Perform Fire Pump Service Tests from draft with a fire apparatus that is equipped with fire pumps as per NFPA 1911-2017 Standards.
- Test variety of handline fire nozzles for GPM and PSI accuracy with purchase of the optional Handline Nozzle Tester as per NFPA 1962-2018 Standards.
- Flow large stationary nozzles.

Optional Fire Hydrant Pump

Enhance your Fire Department's Firefighter and Fire Pump Engineer Training while recycling millions of gallons of water and not wasting expensive treated water. With the Draft Commander 3000[®] Trainer you can continue to safely train fire personnel with no water waste.

Testimonial on the

Draft Commander 3000® Trainer

for Firefighters & Fire Pump Engineers

We have been training our entire department on the use and set up of the Draft Commander for the last 3 days. We have been putting both the draft component as well as the hydrant feature through the paces with great success. All of the crews that have come through the training have had nothing but great things to say about it. All feel this will greatly improve the skill level of our Driver Operators as a whole. Kudos to you and your design team for developing a simple to use but extremely effective training apparatus. By the end of the week we will have ran approximately 150 of our folks through training exercises on the use & possibilities of the Draft Commander.”

Brian Raisley
