

## A FIRE FIGHTING FOAM TRAILER

### THE FOAM COMMANDER

Foam Commander is the newest tool from Weis Fire & Safety for extinguishing lithium-ion and hazardous material fires.

The trailer deploys using any vehicle with a hitch, which can mean **quicker response times** for departments and corporations with limited manpower. Its small footprint is ideal for staging on-site, where fires are likely to occur. Built to the same craftsmanship standards as Weis Fire & Safety brush trucks, the Foam Commander provides many of the **same benefits at a smaller price point**. Call on the Foam Commander to help you serve and protect your community.

Formerly known as the UPF Protector foam trailer, the Weis Fire Foam Commander features the UPF POLY-TANK® and ranges in size from **250 to 3,000 gallons** and is used by military and civilian airports, as well at numerous industrial and municipal locations.

### VIDEOS

Learn more about the Foam Commander by watching our Walkthrough or our conversation with Dan Atkeson, Loss Prevention Specialist at Evergy, as he explains Foam Commander's role at Evergy.
