- Heavy-Duty Aluminum Quick Attack Body
- Multi-Compartment Storage
- HyperSight Thermal Imaging Camera System
- Portable Warn Zeon 10 Winch (Front & Rear Mount)
- NFPA-Compliant Emergency & Scene Lighting

Faster Access to Remote Scenes
Get through rough terrain, fields, and access roads without slowing down or second guessing.

More Control in Unpredictable Conditions
Keeps the vehicle stable over ruts, rocks, and uneven ground so you stay in command.

Reduced Driver Fatigue
Less bounce, less harsh impact. You arrive focused and ready, not worn out.

Safer Transport of Personnel and Equipment
Minimizes jarring movement that can shift gear or throw off balance in the cab.

Improved Traction and Braking Confidence
Keeps tires planted, even on uneven terrain, for better control when it counts.

Consistent Performance Under Load
Handles added weight from water, medical gear, or tools without compromising stability.

Adjustable Ride Height for Terrain and Access
Raise clearance to navigate rough terrain, then lower for easier loading, unloading, and safer entry and exit.

Less Wear and Tear on Equipment
Reduces shock loads that beat up your vehicle and mounted systems over time.
